

## Special Base Project

Joey Isaacson \* Oct 1, 2025

We want to build a Base mini app to the Base App for more exposure to Nook.

This mini app is a self contained app and project. It does not touch users' funds or our main payment systems. It is only a way to showcase how users can access Nook and earn more from it.

### Requirements

- User is logged into the app and their Base wallet is connected
- Follow the Base rules [here](#)
- User sees the current live rate (highest rate of the current 5 earning pools on Nook)
- User sees the table of rates
- User sees how much they could earn (sum of all of their wallet assets \* highest rate)
- Craft is solid, details matter
- Add something you want to see in the mini app that would be interesting. Add your own spin to it (new feature, extra level of craft, etc.)
